About Me

MCA student and full-stack developer with hands-on expertise in Java, Spring Boot, React.js, and FastAPI. I've built end-to-end projects like CareerAI, an AI-powered career guidance platform, and a GitHub RAG Copilot that helps developers understand and document codebases — combining solid engineering with a product mindset to build software that solves real-world problems.

Education

Vivekanand Education Society's Institute of Technology (VESIT) 2025 – Present | Mumbai, Maharashtra
Masters of Computer Application
CGPA: 8.88

Institute of Management Research & Development College. 2021 – 2024 | Shahada, Maharashtra
Bachelor of Computer Application
CGPA: 9.60

R.D.M.P Jr Science College Dondaicha 2020 – 2021 | Dhule, Maharashtra
Class XII
Percentage: 84.50%

Skills

Programming Languages: Python, Java, SQL

Frontend: React.js, HTML5, CSS

Backend & Frameworks: Spring Boot, FastAPI, REST APIs

Databases: MySQL, PostgreSQL, MongoDB, ChromaDB (Vector DB)

Cloud & DevOps: Docker, Git, GitHub, Postman, AWS (EC2, S3, RDS)

Projects

GitHub RAG Copilot, *Intelligent Codebase Understanding & Documentation Assistant* Jan 2026 – Feb 2026
FastAPI, React, ChromaDB, Google Gemini API, SQLAlchemy

- Built a RAG-powered assistant that answers natural-language questions about any GitHub repo with precise file-and-line citations.
- Combined vector search, BM25 keyword search, and reranking to retrieve relevant code, then used Gemini to generate answers, documentation, unit tests, and bug explanations
- Built a dependency graph engine that auto-generates architecture diagrams, with JWT-secured auth and incremental re-indexing to skip unchanged files.

CareerAI, *AI-Powered Career Guidance Platform* Mar 2026 – Apr 2026
Java, Spring Boot, React, PostgreSQL, Gemini API (LangChain4j)

- Built a full-stack career platform offering AI-driven resume analysis, skill-gap detection, mock interviews, and personalized learning roadmaps.
- Designed secure REST APIs in Spring Boot with JWT authentication, BCrypt hashing, and user-scoped access control, powering an AI pipeline that turns resumes into structured feedback (score, strengths, weaknesses, suggestions).
- Developed a responsive React frontend with a real-time AI chatbot, a multi-step mock interview flow with live AI evaluation, and an interactive roadmap viewer.

ArthSaathi, *AI-Powered Financial Inclusion App* Jun 2026 – Jun 2026
Frontend Lead, Nomura KakushIN 2026 — React Native, Expo, Gemma AI, Firebase, LangChain

- Built a React Native/Expo app with multilingual voice UI and offline, on-device Gemma AI for financially underserved users, following Agile sprints.
- Implemented OCR-based fraud detection and government scheme discovery, built for low-connectivity rural use cases.
- Collaborated with the backend lead on a scalable Firebase/LangChain architecture, presenting to judges and advancing to the top 20 of 100+ teams.

AgriSense, *AI-Driven Plant Disease Detection Platform* Oct 2025 – Mar 2026
YOLOv8, ReactJS, FastAPI, Node.js, MongoDB Atlas, Supabase, LangChain

- Collaborated in a 3-member team to build a real-time plant disease detection platform for Maharashtra farmers using a fine-tuned YOLOv8 model.
- Designed a low-latency microservices architecture (ReactJS/Vite, FastAPI) with a MongoDB Atlas-backed treatment recommendation engine and bounding-box visualization.
- Integrated an AI chatbot (LangChain + GPT-4), Clerk-based authentication, and Supabase image storage for contextual farming guidance.

Achievements

Nomura KakushIN Coding Contest 2026

Qualified for Round 2 (Product Presentation) — ranked among the top 20 of 100+ participating teams from VESIT, serving as Frontend Lead and presenting ArthSaathi to a judging panel.

Certificates

AWS Cloud Practitioner Essentials — AWS Skill Builder

AWS Academy Machine Learning Foundations — AWS Academy (via Udacity/AWS)

SQL (Advanced) — HackerRank Skills Certification
